Challenge of Battle
The Real Story of the British Army in 1914

The British Expeditionary Force (BEF) played an immensely significant role in the colossal clash of Europe’s armies in 1914, one of the pivotal moments of 20th century history. Using first-hand accounts, Adrian Gilbert presents an examination of the BEF’s leadership, organization and tactics and gives an un-obscured view of the true historical appreciation of the British Army’s opening campaign in the West, detailing both the successes and failings of the BEF at war.

Collision of Empires
The War on the Eastern Front in 1914

The fighting that raged from East Prussia, through occupied Poland, to Galicia and the Carpathian mountains was every bit as bloody as comparable battles in Flanders and France, but – with the exception of Tannenberg – remains relatively unknown. Inadequacies in supply and support arrangements, together with a failure to plan for a long war, left the combatants struggling to keep up with events, and in addition the Central Powers had to come to terms with the dreaded reality of a war on two fronts. Collision of Empires is a timely re-discovery of the bitter fighting on this forgotten front and provides a magisterial account of the chaos and destruction that reigned when three powerful empires collided.

The Knight Who Saved England
William Marshal and the French Invasion, 1217

Not since Hastings had England been as likely to fall, and only William Marshal’s resistance at Lincoln in 1217 prevented another foreign conquest. It was to be the most important English victory of the medieval period – Agincourt included. Without it there would have been no Magna Carta and parliamentary government – and no subsequent Gettysburg address – nor the distinct English culture that produced Chaucer or Shakespeare. It was William Marshal, the star of the tournament circuit and seasoned henchman of Richard the Lionheart, who came to the country’s rescue in the aftermath of King John’s disastrous reign. His moment of glory at Lincoln is a rare example of a decisive medieval battle.

A History of the World in 100 Weapons
A History of the World in 100 Weapons tells the stories of the hundred definitive weapons whose effects have been the most revolutionary, changing the way war is waged and the very world we live in. From the gladius of ancient Rome to the AK-47, all 100 are revealed in an array of colour photographs and contemporary images. Compiled with the assistance of some of the world’s leading military historians, this volume reveals not only the weapon itself but who wielded it and where, clearly explaining the blow-by-blow advance of military technology and expertise across the ages.

‘This splendid romp through history of warfare can be recommended as both fun and thought-provoking.’ Military Times

Enduring Freedom, Enduring Voices
US Operations in Afghanistan

Using the first-hand accounts of the men and women who have fought in America’s longest, sustained war entailing combat operations, Enduring Freedom, Enduring Voices weaves together the documented history of US military operations in Afghanistan with their personal experiences.

Many books and hundreds of articles have been written about this most recent Afghan war. However, no single work includes not only the view seen from high-level commanders, but also through the soldier’s gun sight, truck driver’s window or airman’s targeting reticuler. From combat operations to covert ops, infrastructure rebuilding to training the local police and Afghan armed forces, in this gripping new book Michael Walling presents timeless stories of determination, heroism, sacrifice and strength.

US Marine Corps Fighter Squadrons of World War II
The US Marine Corps has a long heritage of aviation excellence, celebrating its centennial in 2012. While ‘flying leathernecks’ made their mark in both world wars, Korea, Vietnam and throughout the global war on terrorism, in the public mind they are best known for their exploits in World War II. By far the best known Marine aviators are fighter pilots, namely Greg ‘Pappy’ Boyington, Marion Carl, Joe Foss, John L. Smith and many more, but the historic and organizational background often is lacking. For the first time aviation expert Barrett Tillman presents a book devoted exclusively to Marine fighter squadrons in World War II.

Civil War
Fort Sumter to Appomattox

Undoubtedly the most cataclysmic military struggle of the late 19th century, the Civil War spanned four bloody years of fighting in which over 620,000 American soldiers and sailors lost their lives. From its outbreak at Fort Sumter, South Carolina, in April 1861 until its conclusion at the Appomattox Court House, more than 10,000 battles, engagements and skirmishes were recorded across the length and breadth of America. This book explores the political, historical and cultural significance of the Civil War, examining its impact on the civilians and military personnel caught up in it.

Rising Sun, Falling Skies
The Disastrous Java Sea Campaign of World War II

After Pearl Harbor was attacked, the Japanese forces continued to overwhelm the Allies by seizing resource-rich islands in the Pacific. Allied losses in the early months after America’s entry into the war were great, and amongst the most devastating were those suffered during the Java Sea Campaign, the first major sea battle of World War II in the Pacific.

Jeffrey Cox examines the Allied planning activities, observing where fatal mistakes were made, uncovers poor decisions and missed opportunities and reveals what the Allies gained, irrespective of the destruction they suffered, providing a fascinating new history of a forgotten campaign.

Letters from the Front
From the First World War to the Present Day

A legacy of an empire and a nation at war, Letters from the Front is a collection of letters housed at the Imperial War Museums sent by British and Commonwealth troops from Canada, Australia, New Zealand and South Africa from the front line of war to their loved ones at home.

Compiled by best-selling and award-winning author Andrew Roberts, these poignant expressions of love, hope and fear sit alongside amusing anecdotes, grumbles about rations and thoughtful reflections, eloquently revealing how, despite the passage of time, many experiences of the fighting man are shared in countless wars and battles. From the muddy trenches of the Somme through the frozen ground of the Falklands to the heat and dust of Iraq, these letters are the ordinary soldier’s testament to life on the front line.

Hitler’s Fortresses
German Fortifications and Defences 1939–45

Hitler’s Fortresses is a detailed guide to every level of defensive project in the Third Reich. It goes inside Channel Islands pillboxes, Normandy coastal gun positions and emplaced tank turrets on the Gothic Line in Italy. The secretive world of Hitler’s command bunkers is revealed in detail, and the principles and engineering of basic front-line defences are explained, showing how the average German soldier prepared to stand his ground. There is also a dedicated chapter on special-purpose fortifications, including U-boat pens, V-weapon sites and flak towers. As a guide for both the general historian and for the modern battlefield tourist, this is an authoritative record of the Third Reich’s defensive mindset.

CBT 5

British Infantryman vs German Infantryman
Somme 1916

Featuring specially commissioned full-colour artwork, this engaging study pits the volunteers of Britain’s ‘New Armies’ against the German veterans who defended the Somme sector in the bloody battles of July–November 1916. Although small numbers of defenders inflicted appalling casualties on the attacking British, the Germans would also lose heavily as they launched piecemeal counter-attacks. Dr Stephen Bull, an authority on infantry tactics, explores the realities of combat for the infantrymen of both sides during the epic struggle for the Somme sector at the height of World War I.

CBT 6

Roman Soldier vs Germanic Warrior
1st Century AD

In the 1st century AD the Romans and local peoples were pitched into an epic struggle for control of the territory between the Rhine and Elbe rivers in what is now Germany. Following two decades of Roman occupation, Germania Magna erupted into revolt in AD 9 following the loss of three legions to an alliance of Germanic nations in the Teutoburger Wald. By the summer of AD 16, the Romans had tracked down the enemy commander, Arminius, and confronted him in a set-piece battle at Idistaviso. At the ensuing battle of the Angrivarian Wall the Romans were once again pitted against their Germanic adversaries, as the two sides vied for supremacy at the fringes of the Roman Empire.

MYTH 7

Robin Hood
He robbed from the rich to give to the poor, or so the legend goes. Beginning with a retelling of the ballads that established his stories, this book goes on to explore how the legend grew, and how famous names such as Little John, Friar Tuck, Maid Marian, and Allan-a-Dale became associated with Robin Hood. It also looks at the world in which the outlaw lived and at the historical figures who influenced the tales.

MYTH 8

The Fall of Troy
When Paris, prince of Troy, ran off with Helen, wife of the king of Sparta, it launched the greatest war of the mythic age of Greece. Thanks to the Homer’s Iliad, and numerous other ancient sources, the story of the siege of Troy has survived over 3,000 years. Here, Professor Si Sheppard draws together all of these ancient writings to tell the complete story of the Trojan War. Accompanied by both classical and modern artwork, this book is the perfect primer for those interested in the greatest war of the ancient world.

MYTH 9

Wizards
From Merlin to Faust
From the wise soothsayer with his long grey beard to the deathless necromancer practicing his dark magics, wizards have captured our imaginations since the earliest days of human storytelling. This book collects the tales of the most interesting, popular, and important spell-casters from history, including Merlin, Simon Magus, Hermes Trismegistus, Koschei the Deathless, Nicholas Flamel, Dr John Dee, and Johann Georg Faust. All of the stories are then examined in their historical, mythological, and thaumaturgic contexts.

Across a Deadly Field

Regimental Rules for Large Civil War Battles

JoHN HIlL
Author of Johnny Reb

The American Civil War was a turning point in the history of warfare, as Napoleonic tactics met deadly new technology. Cannons and rifles had become more accurate at longer ranges, rapid-fire pistols gave cavalry a new weapon, and the telegraph and railroad completely altered both strategic and tactical thinking. Across a Deadly Field, the new regimental-level wargame from Osprey Publishing, allows players to recreate this tumultuous period of warfare on the tabletop. Its versatile rules make it possible to refight any battle, from the early skirmishes of Ball’s Bluff and Big Bethel to the grand, set-piece battles such as Gettysburg that decided the war. Written by John Hill, designer of the Johnny Reb series, Across a Deadly Field offers both new and experienced wargamers a fast-paced and dynamic game where even a single regiment can make the difference between victory and defeat.
World War II Glider Assault Tactics

Military gliders came of age in World War II, when glider-assault infantry were the forerunners of today’s helicopter-delivered airmobile troops. From the light pre-war sports and training machines, several nations developed troop-carrying gliders capable of getting a whole squad or more of infantry, with heavy weapons, onto the ground quickly, with the equipment that paratroopers simply could not carry. They made up at least one-third of the strength of US, British, and German airborne divisions in major battles, and also carried out several daring coup de main raids and spearhead operations. However, the dangers were extreme, the techniques were difficult, the losses were heavy and the day of the glider assault was relatively brief.

This book explains the development and organization of glider troops, their mounts, and the air squadrons formed to tow them; the steep and costly learning-curves; and the tactics that such troops learned to employ once they arrived on the battlefield.

CAM 259
The Chesapeake Campaigns 1813–1815
In one of the most dramatic campaigns of the War of 1812, the British decided to strike at the nation’s capital, Washington, DC. A force of Peninsular War veterans under Major-General Robert Ross landed, defeated the Americans at the battle of Bladensburg and took Washington on August 24, 1814, burning the White House. This title examines the lengthy campaign in the Chesapeake Bay region, characterized by raids, skirmishes, and amphibious operations, culminating in the dramatic bombardment of Fort McHenry that inspired the writing of the ‘Star-Spangled Banner’.
